Education

Morehouse College

Bachelor of Science in Computer Science

May 2027

Atlanta, Georgia

- **Relevant Coursework:** Data Structures & Algorithms, Probability & Statistics, Discrete Structures, Linear Algebra
- **Activities:** Codehouse, Morehouse Tech Collective, AUC Tech Collective, IAAMCS

Experience

University of Chicago Data Science Institute

Research Assistant

Jun 2026 – Aug 2026

Chicago, IL

- Applied predictive modeling, time-series forecasting, and geospatial mapping to national CDC datasets to analyze Black Maternal Health disparities.
- Developed an NLP pipeline using LDA topic modeling to extract recurring themes and lived experiences from community survey responses.
- Collaborated in an Agile research environment, leading daily standups and presenting weekly technical progress to UChicago faculty, researchers, and Jewel of Justice leadership.

BE SMART Hackathon 2025

Participant

Nov 2025

Charlotte, NC

- Built a full-stack AI career platform using React, Node.js, and Python, integrating GPT-4, Whisper, and ML scoring algorithms to generate personalized career roadmaps.
- Engineered core feature architecture and interactive UI components within an intensive 24-hour sprint.
- Achieved 3rd place out of 62 teams across 42 HBCUs nationwide, pitching the working platform to executive judges and corporate brand sponsors.

Dana-Farber/Harvard Cancer Center

Research Assistant

Feb 2020 – Jul 2022

Boston, MA

- Conducted research on Myelodysplastic Syndromes (MDS) in the Laurie H. Glimcher Lab, investigating the etiology of hematological malignancies and exploring techniques to rescue severe cytopenia.
- Evaluated mitochondrial dysfunction in hematological malignancies using fluorescence-based assays to measure cellular mass, membrane potential, and oxidative stress.
- Collaborated with MD and PhD researchers, attended advanced oncology seminars, and presented research findings at symposiums and poster sessions.

Projects

Maternal Health Dashboard | *Spring Boot, Express.js, TensorFlow, PyTorch, jQuery, Bootstrap*

- Developed a data visualization dashboard using D3.js, providing stakeholders with real-time insights and improving decision-making processes.
- Built a CI/CD pipeline using Jenkins and Docker, reducing deployment time by 40% and ensuring consistent and reliable releases.

LaunchPad | *React, Node.js, Express, Python, OpenAI API, TailwindCSS, Zustand*

- Drove team consensus on feature architecture and project pacing, aligning technical scope with competition criteria to solve core user needs.
- Designed and implemented responsive frontend interfaces and user flows using React, TailwindCSS, and Zustand to ensure intuitive navigation and seamless onboarding.
- Developed presentation scripts and led live demos, articulating system architecture for technical judges and product viability for business evaluators.

Technical Skills

Languages: Rust, Kotlin, Swift, Go, Scala, TypeScript, R, Perl, Haskell, Groovy, Julia, Dart

Technologies: React.js, Angular, Vue.js, Django, Flask, Ruby on Rails, Spring Boot, Express.js, TensorFlow, PyTorch, jQuery, Bootstrap, Laravel, Flask, ASP.NET, Node.js, Electron, Android SDK, iOS SDK, Symfony

Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization, Agile Methodology, Cloud Computing
